

LONG BEACH CITY COLLEGE

WORKFORCE DEVELOPMENT TRAINING PROGRAMS

Long Beach City College's award-winning, nationally recognized Workforce Development Department provides high-quality, career-focused training. Our programs are designed to match current industry needs and position students and workers for success with the support of industry certified training and a dedicated faculty and staff. Please contact us today to inquire about customized training or to sign up.

HARBOR DRIVER TRAINING PROGRAM

This 14-week training program offers instruction, certification and licensing for commercial truck drivers (CDL Class A) qualified to haul hazardous freight and cleared to operate within the Los Angeles and Long Beach port complexes. This training program, designed in response to industry needs, prepares students for careers as short-haul truck drivers and assists graduates with job placement within the local port trucking industry.

LINCS SUPPLY CHAIN MANAGEMENT

LINCS is a national, entry-level supply chain management education and certification program targeted at new as well as employed workers in this field. LBCC is part of a national consortium of 12 colleges and universities that have developed eight new industry recognized certification training programs in supply chain management. Training classes are less than 40 hours and prepare participants to take the SCPro Fundamentals certification exam offered by the Council of Supply Chain Management Professionals.

CONSTRUCTION PRE- APPRENTICESHIP PROGRAM

This six-week, 140-hour training program prepares participants for union apprenticeship or employment in the construction field and provides industry-recognized certificates upon completion of the program. Subjects include cabinet making, cement masonry, green technologies, H.V.A.C., plumbing, and surveying. Participants will receive three industry recognized certificates: Building Trades Multi-Craft Core Curriculum ("MC3"), 10-hour OSHA Certification, and a CPR and First Aid Training Certification.

HEAVY DUTY PREVENTATIVE MAINTENANCE AND ALTERNATIVE FUELS

This three-week, 80-hour course prepares participants for career opportunities as heavy duty alternative fuels technicians and mechanics. Created in partnership with Republic Services, a nationwide recycling and solid waste management company, this course addresses a shortage of qualified technicians in the industry. Upon successful completion of the program, participants will be prepared to take the Compressed Natural Gas (CNG) Fuel System Inspector Certification test.

ADVANCED TRANSPORTATION TECHNOLOGY COURSES FOR INCUMBENT WORKERS

Through a strategic partnership with El Camino and Cerritos Colleges, our Advanced Transportation Technology Center offers courses to incumbent workers eligible for Employment Training Panel funds, which allows approved employers to receive state subsidization for upskilling their workforce. This program targets municipal and public transit systems' fleet maintenance staff.

CUSTOMIZED TRAINING FOR BUSINESSES

Long Beach City College also can deliver customized training to meet a company's business needs. We have pre-developed curriculum in common training needs areas and can develop new content to serve specific needs.
